

MUHAMAD DEJA ALWI D

DATA ANNOTATION | AI TRAINING DATA SPECIALIST

Tebet, Jakarta Selatan, Indonesia • +62 813-8505-9171 • dezaadzulhian@gmail.com

PROFILE

Information Systems graduate with hands-on experience in AI data annotation for autonomous driving systems, specializing in 2D bounding box annotation, 3D semantic segmentation, and 4D LiDAR cuboid annotation. Experienced in annotating and tracking multi-instance objects across camera and LiDAR data using CVAT, Supervisely, HoloPoint, and Appen, including attribute labeling and cross-validation against camera reference imagery. Capable of processing 200–250 annotated frames per day (400+ data points) while maintaining approximately 93% annotation accuracy against QA benchmarks. Strong attention to detail, data quality, and consistency in handling large-scale datasets and complex annotation workflows.

EDUCATION

Bachelor of Information System, Computer Science and Information

Gunadarma University

Graduated June 2024 • GPA: 3.42

Relevant coursework: Data Modeling & Visualization, Data Mining Concepts, Database Systems, Big Data Computation

PROFESSIONAL EXPERIENCE

DATA ANNOTATOR

Kupu.id

March 2026 – August 2026

- Annotated 2D bounding boxes for traffic sign detection on dual-camera (tele & wide) video feeds using CVAT and Supervisely, tracking multi-instance objects and attributes (cover %, blur, facing) across 11-frame sequences..
- Executed 4D LiDAR cuboid annotation and keyframe-based object tracking using HoloPoint, handling 24+ objects per scene across FRONT/TOP/SIDE views with live W×H×L dimension validation.
- Performed 3D semantic segmentation on LiDAR point clouds of up to 774K points per scene across 9 semantic classes, crossvalidating results against camera reference imagery.
- Used Appen for task distribution, batch delivery, and QA review across the 2D/3D/4D annotation workflow.
- Sustained an average throughput of 200–250 annotated frames per day (400+ data points/day) while maintaining ~93% annotation accuracy against QA benchmarks.

CONTENT CREATOR & SOCIAL MEDIA SPECIALIST

PT Vin Teknologi Sukses Makmur

September 2024 – September 2025

- Created and managed social media content for promotional and e-commerce activities, including preparing content ideas, concepts, captions, and supporting materials.
- Developed creative content based on promotional needs and target audiences to make the content more engaging and relevant.
- Handled the content production process from planning, shooting, editing, to publishing, ensuring content was delivered according to the required schedule.
- Worked as a Copywriter, creating captions, promotional copy, and simple scripts for social media and e-commerce content.
- Worked as a Videographer and Video Editor, producing short-form video content for promotional and social media purposes.
- Served as on-camera talent and E-Commerce Live Host, presenting products and communicating product information in an engaging and easy-to-understand way.
- Supported social media and e-commerce campaigns by creating content that helped promote products and attract audience attention.

- Collaborated with the team to discuss content ideas, promotional activities, production requirements, and content schedules.
- Assisted in documenting promotional and event activities through photo and video content for social media use.
- Worked as a Salesman and Videographer for two Comifuro events at ICE BSD, Tangerang, handling customer interaction, supporting event sales activities, and creating video documentation.

PROJECT EXPERIENCE

SENTIMENT ANALYSIS — THESIS | March 2024 – July 2024

- Conducted sentiment analysis of the 2024 presidential and vice-presidential debate on X/Twitter using the CRISP-DM approach.
- Compared Random Forest, Naïve Bayes, and Support Vector Machine algorithms.
- Tools: Python, Google Spreadsheet, Looker Studio.

INVENTORY MANAGEMENT WEBSITE — COFFEE BREAK | October 2023 – November 2023

- Designed and developed an inventory management system for a coffee shop as part of a scientific research project.
- Implemented stock tracking and reporting features.
- Tools: HTML, CSS, JavaScript, PHP, MySQL.

TRAINING & TOOLS

LePKom – Gunadarma University: Fundamental Networking, Data Analysis, Exploratory Data Analysis, Data Visualization, Statistical Analysis.

Tools: Appen • Google Spreadsheet • Looker Studio • Python • HTML/CSS/JavaScript • PHP/MySQL • Video Editing / Content Production Tools
(add specific tools such as CapCut, Canva, Premiere Pro if applicable).
